ArtBuilt Mobile Studios are small mobile workspaces that let artists, social-service providers and micro-businesses work in new ways and in new places.

These small, movable structures can be built for very little money. They give artists, small entrepreneurs and community groups a way to own their own spaces on a budget they can afford. They can be relocated as needed, allowing their owners to take their assets with them when they move.

ArtBuilt mobile studios change the way that space works in our cities. They provide an affordable way to revitalize unused or under-used areas, and they help communities retain their creative enterprises even when rents spiral out of control.

They are suitable for temporary sites or locations where permanent structures can't be built - like areas prone to storm damage or flooding. And, because they can operate off-grid, they offer a useful resiliency tool in case of natural disaster.

ArtBuilt mobile studios help communities quickly deploy assets - whether arts, entrepreneurial or social service - where they're most needed.

## Mobile Studio Characteristics

- Street-legal, user-towable trailer
- Up to 200 Square Feet
- Energy-efficient, super-insulated
- Can run on grid power, solar or biodiesel
- Integrated heating and cooling
- Customizable for any use
  - Artist workspace
  - Micro-business
  - Social service
  - Community Development

ARTBUILT IS A COLLABORATIVE PARTNERSHIP between non-profits [ArtBuilding](#) and [ArtHome](#), who work to support the creative sector by helping individual creative workers. They focus on financial literacy and business training, home-ownership and other forms of asset-building, access to credit, economic self-sufficiency and micro-enterprise support.
